Prairie State College
Certificate Advising Guide
Web Developer

This program provides students with skills needed for creating websites and coding Web pages. A Web developer is more focused on the way a website works than how it looks. Web developers are required to have strong programming and database administration skills for building and maintaining websites that function well. Once a website is up and running, web developers ensure that the site is cross-functional on all web browsers, periodically testing and updating as needed.

PARTNERSHIP PROGRAMS: Prairie State has partnerships with Microsoft Academic Alliance, Comp TIA and CIW. For further information visit the website at: http://prairiestate.edu/prairie_tech
