Enroll in Firepalooza.

Executive Skills

**New Officer** – Lecture - So you were promoted…..now what? This class is designed to help the newly promoted company officer gain the knowledge on how to lead your crew and increase your competence, confidence, and credibility in the new role.

**Technology in the Classroom** – Lecture – This course is designed to demonstrate the use of new technology in your training classroom and the cognitive benefits these technologies have on the student.

**Training Officer 101** – Lecture - Learn how to keep your training program realistic, progressive and effective as well as compliant with state mandates.

Advanced Firefighter

**Reading Smoke** – Lecture – Keynote continued. This class is designed to reinforce the importance of reading smoke and the ability to recognize a hostile fire event.

**Leadership** – Lecture - This class is designed to recognize the importance of a respectable leader within your organization and learn the ways that leaders get others to follow.

**Size-up** – Lecture – Designed to assist the student in identifying hazards, describing conditions and give a quality arrival report that informs all other incoming units of the situation and sets the tone for the rest of the fire.

Basic

**Mayday** – Lecture – Designed to educate the firefighter on how to recognize and call a Mayday and when emergency traffic should be communicated.

**Forcible Entry** – Hands on Practical - Students will learn to identify situations in which traditional and non-traditional forcible entry techniques should be used. PPE Required

**SCBA** – Hands on Practical – Students will learn the core skills as well as emergency procedures and techniques on how to conserve air while wearing your SCBA. PPE and SCBA Required.

EMS

**Patient Packaging** – Hands on Practical – Students will review packaging points in regard to medical considerations and use of backboards and/or Stokes basket and Reese kit.

**12-Lead EKG** – Lecture – Students will review 12-Lead set ups and EKG strip reading.

**Emergency Child Birth** – Hands on Practical – Students will use our high-fidelity simulator to review emergency procedures in delivery.
