What is Desire2Learn?

Desire2Learn, or D2L, is an integrated learning platform designed to create a single place online for instructors and students to interact, either for a completely online course or as a supplement to a face-to-face course.

This online course area allows an instructor to provide course handouts to students as well as links to videos and useful websites.

The Discussion board gives the instructor and students a place to continue conversations started in class or begin new discussions between classes.

Instructors can also input grades to the grade book so that students can see how they are doing in the class.

D2L also promotes sustainability by providing tools to electronically submit homework assignments and take exams, reducing paper consumption.
