**2 Professors + 2 Courses =  
1 AMAZING Learning Experience!**

### What is a learning community?

\*It is a learning adventure combining two or more courses from different academic subjects.

Some learning communities have combined:

- English and Psychology
- Music and Philosophy
- Communication and Biology

\*Learning communities are team-taught by professors specializing in those subjects.

\*Professors give integrated assignments that create efficient ways to complete coursework because the instructors create assignments that both will accept.

\*Students develop a sense of community with professors and other students

\*These connections encourage active and collaborative learning.

Learning Communities offer vital academic resources to help students on their paths to graduation!

### If you have any questions, contact a member of the Learning Communities Committee:

Sarena Lee-Schott (Chair)
