Macros

Create a macro

1. Select the **View** tab.

2. Select **Macros** then **Record Macro**.

3. Enter a name for the macro.

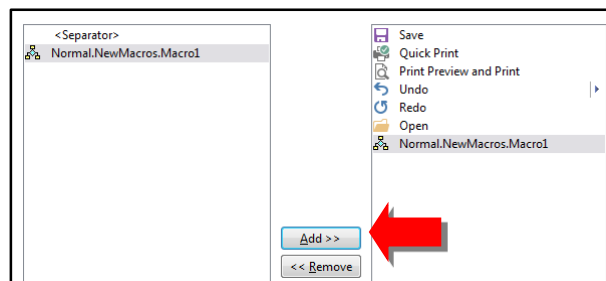

4. To use the macro in any new documents, select **All Documents (Normal.dotm)** from the **Store macro** drop-down box.

5. To run the macro from a button:
 - a. Select **Button**.

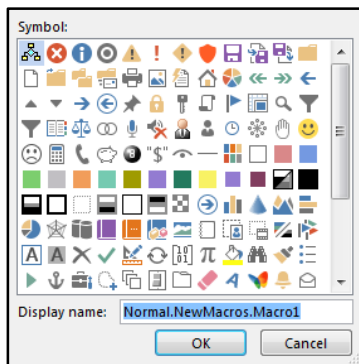

- b. Select the new macro and click **Add**.

- c. Select **Modify**.

- d. Choose the button image.

- e. Enter the **Display name**.

- f. Select **OK** twice.

6. To run the macro from a keyboard shortcut:

- a. Select **Keyboard**.

- b. In the **Press new shortcut key** box, type a combination of keys.

- c. Check to see if the combination is already in use. If so, enter a different combination.

- d. To use the shortcut in new documents, select **Normal.dotm** in the **Save changes in** box.

- e. Select **Assign**.

7. Click the commands or press the keys for each step in the task.

Note: Use the keyboard (**Ctrl+Shift+F8** then use the arrow keys) to select text while recording. Macros don't record selections made with a mouse.

- To stop recording, select **Macros** then **Stop Recording**.

Run a macro

- Select the **View** tab.

- Select **Macros** then **View Macros**.

- In the list under **Macro name**, select the macro you want to run.

- Select **Run**.

Make macro available in all documents

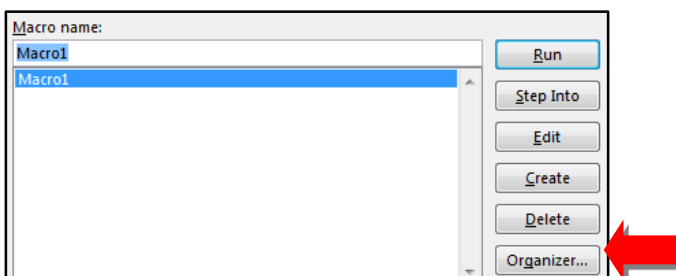

- Open the document that contains the macro.
- Select the **View** tab.

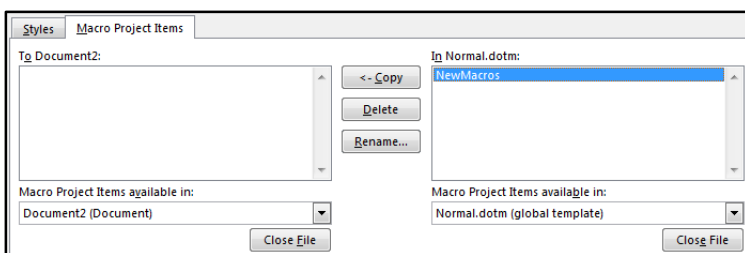

3. Select **Macros** then **View Macros**.

4. Select **Organizer**.

5. Select the macro to add to the Normal.dotm template.

6. Select **Copy**.

Add macro button to the ribbon

1. Select the **File** tab.

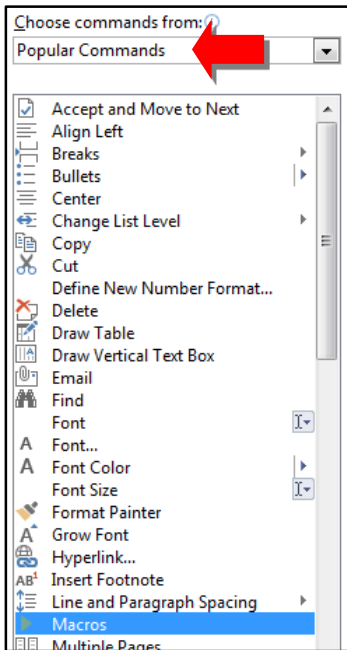

2. Select **Options**.

3. Select **Customize Ribbon**.

4. Under **Choose commands from**, select **Macros**.

5. Select the macro name.

6. Under **Customize the ribbon**, select the tab and custom group where you want to add the macro.

7. Select **Add**.

8. Select **Rename** to choose an image for the macro and enter a name.

9. Select **OK** twice.
