

Using Both Portrait and Landscape

Sometimes you may need to use both portrait and landscape layouts in the same document. This can be accomplished using the steps below.

1. Select the table that needs to be in a different page layout.
2. Right-click and choose **Table Properties**.

3. On the **Table** tab, select **None** for Text Wrapping.

4. Select **OK**.
5. On the **Page Layout** tab select the Page Setup dialog launch icon.

6. Select the **Margins** tab.
7. Select **Landscape**.

8. In **Apply to** choose **Selected Text**.

9. Select **OK**.
